

Summary

Junior Data Engineer with a strong interest in data, AI, and software development. I enjoy turning what I learn into practical solutions, with hands-on experience in Python, SQL, ETL, Generative AI, and modern web technologies. Comfortable working both independently and as part of a team, I'm always looking to deepen my technical skills, take on new challenges, and grow as an engineer.

Education

Cluj-Napoca, RO Technical University of Cluj-Napoca 10/2021 - 07/2025

- Bachelor of Engineering in Computer Engineering.

Work Experience

Cluj-Napoca, Romania Endava 06/2026 - Present

Junior Data Engineer

- Developed practical Data Engineering skills in SQL, PL/SQL, RDBMS, data modeling, ETL pipelines, data transformation, and database operations through hands-on team assignments.
- Built strong foundations in Python and Generative AI, working with RAG, text embeddings, LLM function calling, image generation, Prompt Engineering, and Custom GPT development.
- Gained foundational knowledge of Data Science and Machine Learning, including data preprocessing, supervised and unsupervised learning, model training, evaluation, and core ML concepts.
- Strengthened software engineering practices using Git, GitHub, GitLab, and GitHub Copilot, including branching, version control, collaborative workflows, and AI-assisted development.
- Expanded full-stack development skills with Next.js, React, TypeScript, and Tailwind CSS, applying modern frontend development practices in a collaborative environment.
- Gained exposure to DevOps, Cloud, Application Management, Agile/Scrum, ITIL, and Waterfall, building an understanding of modern software delivery and ways of working.
- Strengthened professional skills in effective communication, active listening, time management, assertiveness, teamwork, and self-awareness through dedicated workshops.

Remote Core Elevating Media 07/2024 - 08/2024

Software Engineer Intern

- Contributed to full-stack web development using React, Node.js, Express, and SQL.
- Built responsive user interfaces and integrated RESTful APIs with JWT-based authentication.
- Implemented automated testing (unit, integration, and E2E) using Jest and Cypress.
- Collaborated with the development team using Git and CI pipelines (Jenkins).

Projects

Data Integration ETL Pipeline

- Collaborated in a team to design and implement an ETL solution using relational database technologies.
- Took ownership of ingesting data from 5 raw data files into the database, applying data loading, transformation, and validation concepts.
- Worked with source, staging, and target data layers, applying SQL/PL/SQL and data modeling principles throughout the ETL workflow.

AI Smart Librarian

- Independently developed an end-to-end RAG-based AI book recommendation application using Python, OpenAI SDK, and ChromaDB, indexing 12+ books and retrieving the top 3 semantically relevant results per user query.
- Integrated 3 OpenAI-powered capabilities: semantic search using text embeddings, LLM function calling, and AI image generation.
- Implemented a custom function-calling tool, prompt engineering, input validation, and AI orchestration to deliver context-aware book recommendations.

AI-Powered In-Car Assistant — Frontend

- Developed a responsive frontend app for an AI-powered in-car assistant using NextJS, React, Typescript and Tailwind CSS.
- Built a trip planning workflow with origin/destination inputs, route preferences, family-friendly options, validation, loading states, and API error handling.
- Collaborated within a Agile development team, following a shared API contract and Git feature-branch/PR workflow.

Technical Skills

- Languages: C/C++, TypeScript, JavaScript, HTML/CSS, Python, Java, PL/SQL, Kotlin, VHDL, Assembly.
- Frameworks and libraries: React, React Native, NativeWind, NextJS, TailwindCSS, Expo, Angular, Node.js, Flask, Spring Boot, OpenGL, OpenCV.
- Tools: MySQL, PostgreSQL, MongoDB, Git, Docker, Traefik, Nginx, RabbitMQ, Linux, Arduino.

Certifications

LLM Performance Engineering - O'Reilly

- Generative AI, Artificial Intelligence (AI), Large Language Models (LLM), Prompt Engineering, AI & ML, Machine Learning, Natural Language Processing (NLP)

GenAI Essentials for Everyone - O'Reilly

- ChatGPT, Generative AI, LLM, Prompt engineering

Social Enterprise Manager

- Leadership, teamwork, problem-solving, innovative thinking, strong communication skills
